

# **PROTECTING THE PIG Book**

## **Chapter 2 Charts**

## CONTENTS:

Trend Colors.....	Slide 3
1920's Primary Trends.....	Slide 4
1930's Primary Trends.....	Slide 5
1940's Primary Trends.....	Slide 6
1950's Primary Trends.....	Slide 7
1960's Primary Trends.....	Slide 8
1970's Primary Trends.....	Slide 9
1980's Primary Trends.....	Slide 10
1990's Primary Trends.....	Slide 11
2000's Primary Trends.....	Slide 12
2010's Primary Trends.....	Slide 13
Disclaimer.....	Slide 14

**The enclosed charts highlight:**

- The Primary Trend (referenced in Chapter 1)
- The “Blue Line” (referenced in Chapter 2)
- The daily price change of the S&P 500 Index
- Time (10 Years for all charts except the 1920’s)

**The primary trend can be identified according to the following color scheme:**

- GREEN dashed lines represent a Rising Trend
- RED dashed lines represent a Declining Trend
- GREY dashed lines represent a Sideways Trend

Please refer to Slide 14 for important disclaimers.

## Disclaimer:

The S&P 500 Index is one of the most commonly followed equity indices, and many consider it one of the best representations of the U.S. stock market, and a bellwether for the U.S. economy. It is comprised of 500 large companies having common stock listed on the NYSE or NASDAQ. It is not possible to invest directly in this index.

Technical analysis is a method of evaluating securities by analyzing statistics generated by market activity, such as past prices and volumes. Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets may not always follow patterns. There are certain limitations to technical analysis research, such as the calculation results being impacted by changes in security price during periods of market volatility. Technical analysis is one of many indicators that may be used to analyze market data for investing purposes and should not be considered a guaranteed prediction of market activity. The opinions expressed are those of the author as of the date of publication and are subject to change without notice.
